<p>12</p>	<p>Early Learning and Development Guidelines (ELDGs) Participants will receive an overview of the newly revised CNMI Early Learning & Development Guidelines for children ages birth to age 5. The guidelines address five developmental domains reflecting a child’s developmental progression – Approaches to Learning, Social and Emotional Development, Language and Literacy, Cognition, and Perceptual, Motor, and Physical Development. CNMI created the standards knowing that children’s early experiences lay the foundation for school success and life. The ELDGs are a set of expectations or developmental milestones that describe what all children birth to age 5 should know and be able to do. Parents, caregivers and teachers can use this information to guide their interactions with young children and build upon children’s emerging abilities, knowledge, and strengths. Definitions:

Training is a learning experience, or series of experiences, specific to an area of inquiry and related set of skills or dispositions, delivered by a professional(s) with subject matter and adult learning knowledge and skills. A planned sequence of training sessions comprises a training program.

Preservice or initial training refers to PD in which an individual engages prior to beginning a position. Preservice training may be required for early childhood professionals to serve in a role.

In-service or ongoing training is PD in which early childhood professionals engage to enhance their skills and remain current regarding knowledge and practice in the field. In-service training may be required for early childhood professionals to continue serving in a role.

Technical Assistance (TA) is the provision of targeted and customized supports by a professional(s) with subject matter and adult learning knowledge and skills to develop or strengthen processes, knowledge application, or implementation of services by recipients

Mentoring is a relationship-based process between colleagues in similar professional roles, with a more-experienced individual with adult learning knowledge and skills, the mentor, providing guidance and example to the less-experienced protégé or mentee. Mentoring is intended to increase an individual’s personal or professional capacity, resulting in greater professional effectiveness.

Coaching is a relationship-based process led by an expert with specialized and adult learning knowledge and skills, who often serves in a different professional role than the recipient(s). Coaching is designed to build capacity for specific professional dispositions, skills, and behaviors and is focused on goal-setting and achievement for an individual or group.

Consultation is a collaborative, problem-solving process between an external consultant with specific expertise and adult learning knowledge and skills and an individual or group from one program or organization. Consultation facilitates the assessment and resolution of an issue-specific concern—a program-organizational-, staff-, or child-/family-related issue—or addresses a specific topic.
